**24/7 self service access
from any device**

**Customisable reports and
dashboards**

**Claims data updated
weekly**

Self service reporting tool that allows you to quickly and effectively retrieve the most current claims reports for your policy anywhere, anytime.

About the Portal

The myGBonline Reporting Portal is a self-service reporting tool that allows you to quickly and effectively retrieve the most current claims reports for your policy anywhere, anytime.

The Reporting Portal has been specifically designed for the workers' compensation industry to increase your administration efficiencies and enhance your ability to identify trends and proactively create solutions in real-time.

The portal allows for fast, secure and private document sharing and in-depth analysis and reporting that can be customised to your internal requirements - this culminates in an industry-leading offering for our clients only, allowing you to be in control.

Who can use it?

There is no limit to the number of staff that can access the Reporting Portal; you will have complete control to view all your claims data and policy information. Plus, it's simple and fast to set up, and intuitive to use.

Why use it?

- ✓ Designed specifically for workers' compensation
- ✓ Fast, secure and private document sharing that allows GB to share documents with you
- ✓ Accessible anytime, anywhere
- ✓ No cost - complimentary for GB clients

What do you have access to?

myDashboards

myDashboards allows you to identify recurring issues and positive trends so that you can proactively develop strategies that mitigate or manage your claims problems.

myDashboards provides you with graphical representations of your claims, premium, injury, accident and claim lodgement data.

Depending on the level of detail required, dashboards can be built to examine graph components in greater depth or altered to provide a more summarised view, as shown below:

Create trend analyses for claims, premium, injury, accident and claim lodgement.

With a simple and intuitive landing page, you can gain access to your dashboard, reports and documents easily.

myReports

myReports delivers two reports: cost of claims and payments to date. Exporting these reports is simple to do. Reports can be exported in Excel, PDF, Word, CSV, XML, TIFF file and XHTML file formats so that you can integrate the reports into your organisation's internal reporting requirements.

myDocuments

The myDocuments functionality allows GB to share documents with you and your organisation. Should you wish GB to share documents with you, please contact your Business Account Manager who will be able to assist you.
